## Permit Application

We charge \$100 per year

Identify Nests, Nest Removal Oil Eggs, Deterrent Tactics  
We charge by the visit \$250.00 plus tax

If you want us to charge by the year we can estimate the number of visits it would take to control the problem. Our experience indicates that total Geese control requires daily doses of control. Therefore we feel 30days of continuous service is required to provide full control of the situation. After this period we will reduce service to once or twice a week as necessary.

-1<sup>st</sup> 30 days price at \$11,000.00. Daily visits.

-Any time there after until June \$4750 described at 3 times visits a week

-July round up: for up to 50 geese \$4500.00

-July to end of November if needed \$ 3285.00 per month based on twice a week visits.
